

# Exam 1 - Play Computer

**1**

Record the changes to variables and the output of the program.

```
for i in [1, 3, 2, 0, 4]:  
    print(i, end="")  
    if i%3==0:  
        continue;  
    print()
```

variable	values
i	

**Output:**

**2**

Record the changes to variables and the output of the program.

```
for i in [2, 1, 3, 1]:  
    for j in range(0,i):  
        print("A", end="")  
    print("B")
```

variable	values
i	
j	

**Output:**
