CS-170 Web Programming
Fall 2020 - Syllabus and Information

Contact Your Instructor

Name: *Robert Sternfeld*

Email: *robert.sternfeld@indstate.edu*

Office: Root Hall (RO), *A-180* (literature/linguistics wing, but NO ACCESS; use Teams)

Course Website: cs 170 site
CS Server Instructor/Class Directories

 cs.indstate.edu: */u1/h0/sternfl/170*

Lecture

   MWF 8:00am - 8:50am Root Hall (RO) A017 (Mostly virtual; come to 017 for help)

Final Exam:
   F   12/13/2020   8:00am

Instructor Office Hours

M-F   10:00am - 11:00am   virtual on Teams

The above are my official office hours. If those times will not work for you, you may contact me so we can set up an alternative time to meet.

Computer Resources:
CS Unix Lab:
   Root Hall (RO), *A-015* (basement, just west of west stairwell, first door on the left).

Graduate Assistant Tutoring:
   See http://cs.indstate.edu/info/labs.html

Prerequisites:
 C or better in CS 151

Texts
   Website: w3schools.com

Course Website
The majority of this course will be run through the course website linked at the top of this document. Bookmark this page. The course website contains announcements, a schedule of due dates, course assignments,

lecture materials, and even links to exams and projects. You should check this site daily if possible, but twice a week at minimum to ensure that you do not miss an assignment.

Course Announcements

Announcements regarding the course will be posted under the *Announcements* section of the course website. Announcements may also be made during class (if applicable), via Mattermost Chat, or via your ISU sycamores email account. You should regularly check your email account or have it forwarded to an account that you check regularly. The *Announcements* section of the course website should be the most comprehensive list of any and all course activity, so check it regularly.

Classroom Conduct

You may not use cell phones, iPods/music players, etc. during class unless otherwise stated. If I can hear your headphones that means you are being disruptive, and if I have to ask you to turn down a device more than once, you may be asked to leave that day's lecture. You should be civil and respectful to both the instructor and your classmates, and you should arrive to class a few minutes before the scheduled lecture so you are ready for lecture to begin on time. You may use your computer during class if you are using it to follow along with the examples that are being discussed. You may not check social media or work on other courses, etc. during class. Do not consume or share any inappropriate material at any time. Be professional so that you may become a professional.

Ethics

The intentional or malicious use of systems, software, or application settings, to undermine another student's educational experience will not be tolerated and may warrant extreme academic consequences on par with plagiarism. Malicious tampering with user accounts, settings, or systems of students, instructors, or any other group or individual will be penalized similarly.

Mattermost Chat

The CS Department makes use of a collaboration tool called Mattermost that allows CS students to communicate with each other via chat messages. This software is an enterprise grade collaboration tool, and most organizations you encounter over the duration of your career will utilize something similar. It is a requirement for this course to use this software. Mattermost chat is an extension of the classroom, so all of the above policies on classroom conduct apply. Be courteous and professional. If you break the conduct policies, your Mattermost user can be removed from the system even though some assignments require its use. In that case, you will automatically forfeit those points, and, depending on the severity, you may be removed from the course with an F grade.

Course Information

Course Number: CS-170

Course Name: Web Programming

Course CRN: section 002: 52629; section 301: 53834

Credit Hours: 3.0

Course Catalog Description:

An introduction to web programming methods and languages. Includes an introduction to the standard HTML/CSS/JavaScript triumvirate of languages for client-side web page development. May also include an introduction to web servers, web applications, web API's and back-end systems, as well as topics covering current trends in the field.

Course Outline

08/17-09/04   HTML
09/07-09/21   CSS, web page appearance
09/28-10/23   JavaScript, web behavior
10/26-11/20   PHP, connecting to sqlite

Learning Outcomes

Be able to write web pages, control their appearance, control their behavior, and also make simple web apps

Expected Amount of Work

If you take this class seriously and get what you should out of it, some weeks you will likely be spending around **_3-6 hours/week_** or more on the class work (outside of lecture time). The students who get A's in their CS courses and have an easy time finding jobs do spend this much time on this course. Not everyone would need to spend this much time and not all weeks will be the same, but you should plan on putting in whatever time it takes.

Note - your classes should be more important than your part-time job.

Course Work

Your grade will be determined by how well you do your course work. There are four types of class work.

Class participation. I will keep track of your answers to my questions. Each student should participate at least once a week. A good bit of class participation will be virtual using Teams software that you can download from portal.office.com.

Reading. Before class you will use a browser to read assigned sections of the *w3schools.com* Website. No points, but what you learn will help you with class participation, with quizzes and tests, and with making Web pages.

Homework. You will log onto the cs server, cs.indstate.edu, and work on your assignments by writing html files, css files, and javascript files. These files should be in the public_html sub-directory of your account. The Web page or Website of the assignment can be viewed with your browser.

Quizzes, Tests, Final Exam.

Item	Percent
class participation	10%
homework	10%
quizzes (combined)	10%
Test 1	14%
Test 2	14%
Test 3	14%
Final	28%

There will be about one quiz a week. No quiz in a week with a test. There will be 3 tests during the semester. A quiz lasts about 10 minutes. A test will last 50 minutes. Most quizzes and tests will be on-line.

.

CS Course Policies

Note that this course follows all standard CS course policies. In particular check the CS course policies related to - cheating/plagiarism, attendance, missing exams. See http://cs.indstate.edu/info/policies.html for details.

Late Work

Late work may well not be graded. Get Help: Contact me via email or chat if you need help. **If you begin to struggle or fall behind, contact me as soon as possible. Do not wait until the end of the semester; that will be far too late!**

Start Homeworks Early

We suggest attempting a homework assignment the day it is given, or the day after, so that if you have a problem you can ask early. If you continue to have problems in trying to complete the assignment, you will have time to ask again. Many of the homework assignments require thought and problem solving, which takes "time on the calendar" not just "time on the clock". By that we mean that spending two hours on 3 consecutive days may be more productive than trying to spend 6 hours at once on the assignment.

Blackboard

The course has a blackboard site. Click here to go to blackboard. You should see this course listed under your courses for the current term. The blackboard site is only used for giving you your grades (go to the course in blackboard, then click "My Tools", and then "My Grades"). All course content, schedule, etc. is kept in this google doc (which you are currently viewing).

Academic Integrity

Follow the standard CS course policies in terms of what is and is not allowed on assignments: http://cs.indstate.edu/info/policies.html

Please ask the instructor if you have doubts about what is considered cheating in this course.

Special Needs / Student Disabilities
Standard language included in the syllabi for ISU courses.

Indiana State University recognizes that students with disabilities may have special needs that must be met to give them equal access to college programs and facilities. If you need course adaptations or accommodations because of a disability, please contact us as soon as possible in a confidential setting either after class or in my office. All conversations regarding your disability will be kept in strict confidence. Indiana State University's Student Support Services (SSS) office coordinates services for students with disabilities: documentation of a disability needs to be on file in that office before any accommodations can be provided. Student Support Services is located on the lower level of Normal Hall in the Center for Student Success and can be contacted

at 812-237-2700, or you can visit the ISU website under A-Z, [Disability Student Services](#) and submit a Contact Form. Appointments to discuss accommodations with SSS staff members are encouraged.

Once a faculty member is notified by Student Support Services that a student is qualified to receive academic accommodations, a faculty member is obligated to provide or allow a reasonable classroom accommodation under ADA

Disclosures Regarding Sexual Misconduct

Standard language included in the syllabi for ISU courses.

Indiana State University fosters a campus free of sexual misconduct including sexual harassment, sexual violence, intimate partner violence, and stalking and/or any form of sex or gender discrimination. If you disclose a potential violation of the sexual misconduct policy I will need to notify the Title IX Coordinator. Students who have experienced sexual misconduct are encouraged to contact confidential resources listed below. To make a report or the Title IX Coordinator, visit the Equal Opportunity and Title IX website: http://www.indstate.edu/equalopportunity-titleix/titleix.
