

Syllabus for CS 303 Discrete Structures

General Information

Contact Your Instructor

Name: *Robert Sternfeld*

Email: *robert.sternfeld@indstate.edu*

Phone: *812-237-2137*

Office: *Root Hall, A-140F*

Lecture, Exam, Office Hours

Lecture: *TTh 9:30-10:45*

CRN: *12391*

Credit Hours: *3*

Exam: *May 10 T 10:00* Also check the [Office of the Registrar's exam schedule](#)

Instructor Office Hours: *TTh 11:00-11:50; W 9:00-9:50;*

I will usually be available in the mornings after class and 1-3 in the afternoons.

GA Tutoring: See <http://cs.indstate.edu/info/labs.html>

Prerequisites

Prerequisites: A grade of C or better in CS 201

Recommended Texts

recommended texts: Discrete Mathematics and Its Applications

With Combinatorics and Graph Theory by Kenneth H. Rosen

- <https://www.people.vcu.edu/~rhammack/BookOfProof/>

Course Announcements

Announcements regarding the course will be made both during class and via email to your @sycamores.indstate.edu email address. You should regularly check this email account or have it forwarded to an account that you check regularly.

Classroom conduct

You may not use cell phones, iPods/music players, etc. during class. You should be civil and respectful to both the instructor and your classmates, and you should arrive to class a few minutes before the scheduled lecture so you are ready for lecture to begin on time. You may use your computer during class if you are using it to follow along with the examples that are being discussed. You may not check email, facebook, work on other courses, etc. during class.

Course Description

The official description of this course from the catalog is:

This course is an introduction to discrete mathematics for computer science. The course covers the basic topics from set theory (including functions and relations), logic, number theory, counting, graph theory, and discrete probability. It involves a detailed study of proof techniques. Prerequisites: A grade of C or better in CS 201

Course Outline

- **Logic:** proof tables, existential quantification, universal quantification, proposition, propositional function, De Morgan's law (R. Ch. 1 - "R." refers to the Rosen book, see below.)
- **Basic set theory:** sets, intersection, union, complement, Venn diagram, inclusion-exclusion principle (R. Ch. 2)
- **Proof techniques:** direct proof, contrapositive proof, proof by contradiction, weak induction, strong induction (P. Part 2 and R. Ch. 5 - "P." stands for the "Book of Proof", see below.)
- **Counting:** permutations, combinations, binomial theorem, identities (e.g. {Pascal's identity) pigeonhole principle and applications, double counting (R. Ch. 6)
- **Discrete probability:** sample space, events experiments, outcomes, distributions, conditional probability, random variables, independence, expectation, linearity of expectation (R. Ch. 7)
- **Optional topics:** Monty Hall problem, 100 prisoners problem, probabilistic method to prove lower bound on Ramsey numbers
- **Number theory:** modular arithmetic division algorithm, modular exponentiation, primes, sieve or Eratosthenes, gcd, lcm, Euclidean algorithm, Bezout's theorem, inverses, fundamental theorem of arithmetic, solving linear congruences, affine cipher, RSA (R. Ch. 4)
- **Graph theory:** basic graph terminology, undirected graphs, bipartite graphs, degree of a vertex, handshaking theorem, matchings, Hall's marriage theorem (optional) (R. Ch. 10)

Learning Outcomes

Being capable of constructing rigorous proofs: Direct proofs, proofs by contradiction, proofs by induction, etc.

Expected Amount of Work

If you take this class seriously and get what you should out of it, some weeks you will likely be spending around **8 hours/week** or more on the class. The students who get A's in their CS courses and have an easy time finding jobs do spend this much time on this course. Not everyone would need to spend this much time and not all weeks will be the same, but you should plan on putting in whatever time it takes.

Note - your classes should be more important than your part-time job.

Grading and Assignments

The students of this course have the following responsibilities: read assigned readings before lecture, attend lecture, complete homework assignments, take in-class quizzes, take exams, and complete a project.

Category	Weight
Homework	10
Quizzes	20
Tests	50
Final	20

Course Grade is computed in two steps. First, a percent grade in each of the 4 categories is computed. The Course Grade is the weighted average of the percent grades. 90 or above is an A. Below 90, but 80 or above is a B. And so on for C's and D's. Below 60 is F.

CS Course Policies

Note that this course follows all standard CS course policies. In particular check the CS course policies related to - cheating/plagiarism, attendance, missing exams. See <http://cs.indstate.edu/info/policies.html> for details.

Late Homeworks

Do not hand in late homework.

Start Homeworks Early

We suggest attempting a homework assignment the day it is given, or the day after, so that if you have a problem you can ask early. If you continue to have problems in trying to complete the assignment, you will have time to ask again. Many of the homework assignments require thought and problem solving, which takes “time on the calendar” not just “time on the clock”. By that we mean that spending two hours on 3 consecutive days may be more productive than trying to spend 6 hours at once on the assignment.

Blackboard

The course has a blackboard site. Click [here](#) to go to blackboard. You should see this course listed under your courses for the current term. The blackboard site is only used for giving you your grades (go to the course in blackboard, then click “My Tools”, and then “My Grades”). All course content, schedule, etc. is kept in this google doc (which you are currently viewing).

For online courses - if any parts of blackboard are used for the course, mention it here if appropriate.

Academic Integrity

Follow the standard CS course policies in terms of what is and is not allowed on assignments: <http://cs.indstate.edu/info/policies.html>

Please ask the instructor if you have doubts about what is considered cheating in this course.

Special Needs / Student Disabilities

Standard language included in the syllabi for ISU courses.

Indiana State University recognizes that students with disabilities may have special needs that must be met to give them equal access to college programs and facilities. If you need course adaptations or accommodations because of a disability, please contact us as soon as possible in a confidential setting either after class or in my office. All conversations regarding your disability will be kept in strict confidence. Indiana State University's Student Support Services (SSS) office coordinates services for students with disabilities: documentation of a disability needs to be on file in that office before any accommodations can be provided. Student Support Services is located on the lower level of Normal Hall in the [Center for Student Success](#) and can be contacted at 812-237-2700, or you can visit the ISU website under A-Z, [Disability Student Services](#) and submit a Contact Form. Appointments to discuss accommodations with SSS staff members are encouraged.

Once a faculty member is notified by Student Support Services that a student is qualified to receive academic accommodations, a faculty member is obligated to provide or allow a reasonable classroom accommodation under ADA.

Disclosures Regarding Sexual Misconduct

Standard language included in the syllabi for ISU courses.

Indiana State University fosters a campus free of sexual misconduct including sexual harassment, sexual violence, intimate partner violence, and stalking and/or any form of sex or gender discrimination. If you disclose a potential violation of the sexual misconduct policy I will need to notify the Title IX Coordinator. Students who have experienced sexual misconduct are encouraged to contact confidential resources listed below. To make a report or the Title IX Coordinator, visit the Equal Opportunity and Title IX website:
